

X

1. Fold your paper in half, like a hamburger, so page is $5\frac{1}{2} \times 8\frac{1}{2}$ ".
2. Cut from the fold along the solid line, through both thicknesses of paper.
3. Crease along the dashed line and fold it back and forth until it is flexible.
4. Open the paper, blank side up. Holding one finger at the X, lift up the scalloped edge and reverse the fold in the middle of the umbrella so it pops forward.
5. Glue a folded sheet of paper behind the pop-up to create a cover and a space to write your story. Draw an umbrella handle and weird weather phenomena!
